

## Boost your sales with the most versatile banner display

### A visual impact in just a few steps.

The assembly of the duo.sprint is reduced to the minimum. One minute to open the carry case, put up the pole, attach the graphic and adjust the height. This is fast - very fast - without tools or parts to fit together.

The duo.sprint is a banner stand with a telescopic pole that can reach a height of 3 meters. Several widths and heights are possible to display single or double-sided graphics on the same frame, or to use rigid or flexible substrates. The duo.sprint comes with accessories such as brochure holders and/or lights.

1. The tripod feet linked with bungee cord induces a quick, simple and secure automatic set-up. The base brings three rest points for variable placements.
2. The high-precision undercutting steel node is essential for a necessary weight that brings balance and overall steadiness.
3. The state of the art spin-lock mechanism on the telescopic pole induces an easy height adjustment without tools. The high-gripping plastic twisting locks ensure the holding of the pole once extended.

4. The adjustable ring is a sliding part on the pole secured without any tool thanks to the locking screw. Easy to handle and adjust, the ring offers a great versatility in graphics sizes.
5. The head of the pole can easily hang 2 graphics. The head of the pole is compact on purpose in order to reduce the risks of shocks.
6. The floodlight can be inserted on the special groove located on the head of the pole. This sliding-groove is an optimized hanging system.

## YOU DESERVE THE ORIGINAL!

One frame for infinite applications

- Standard widths:  
60, 80, 100 & 120 cm
- Double-sided  
graphic panels
- Variable widths  
and lengths
- Floodlight  
solutions
- Custom-shaped graphics  
or rigid panels

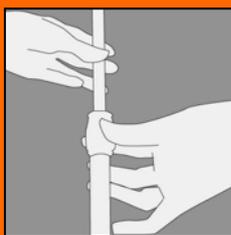

It is not a luxury to count on **THE ORIGINAL** duo.sprint

Literature holders or shelves

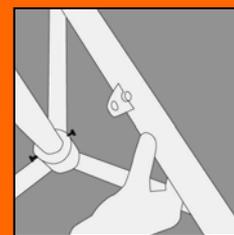

Automatic set-up  
of the base

Lock the height  
with twist-lock

Adjust the graphic  
on top of the pole

Attach the graphic  
on the bottom pin

Secure the tension  
of the graphic
